This presentation makes reference to certain **non-IFRS measures**. Adjusted Net Earnings (Loss), distributable cash, payout ratio, same store sales and same store sales growth are non-GAAP financial measures and do not have standardized meanings prescribed by IFRS. However, the Fund believes that distributable cash, payout ratio, same store sales and same store sales growth are useful measures as they are key performance indicators, helping investors assess cash available for distribution. The Fund's method of calculating these measures may vary from that of other issuers and, accordingly, these measures may not be comparable to measures used by other issuers. Investors are cautioned that distributable cash and the payout ratio should not be construed as an alternative to the statement of cash flows as a measure of liquidity and cash flows of the Fund. For more information, please refer to the Fund's most recent Management Discussion & Analysis available on SEDAR and at www.sircorp.com.
